

NEBTEK Announces Updated Firmware - April 2009

NEBTEK False Color is a whole different way of looking at Exposure Measurement. Press Blue Only twice and It allows for a visual look at exposure in the frame with out referencing a scope. This is a carefully calibrated exposure measurement tool that requires an understanding of exposure and Video waveforms as calibrated to IRE units. Usually, when shooting subjects like faces and skin tones , it is normal to set exposure of faces to approximately 56 IRE. The False Color function will show this range in PINK on the monitor. GREEN is used to indicate elements of the image that are approximately 45 IRE. This represents a Mid tone exposure used for objects. So as you increase exposure, your subject will change color as indicated on the chart: PINK, then GREY, then a few shades of YELLOW then ORANGE. Overexposed subjects (above 101 IRE) on the monitor are shown as RED. Under exposed areas will show as DARK-BLUE to DEEP-BLUE, with clipped-blacks indicated with a PURPLE color.

		<p>Exposure Normal Some pink shows Normal flesh tones. In monitor key can be displayed to show colors as IRE units.</p>	
		<p>Over Exposed Red indicates levels over 100 IRE. Too much light on the face showing in orange and yellow indicate that the image is too bright.</p>	
		<p>Under Exposed Cool colors indicate low levels the face is clearly too dark shown in Black, blue and dark blue then Deep blue. Purple indicates crushed blacks.</p>	

Markers 16:9	Markers 4:3
Guides 4:3, 1.85:1 2.35:1	Guides N/A
Safe Areas 95%, 90%, 85%	Safe Areas 95%, 90%, 85%

OSD Display for Picture Control is smaller in size then in earlier versions and is displayed in the lower left hand part of the screen which allows for setting levels while still being able to view the pluge bars. Zoom Mode and Pixel to Pixel Mode are additions from earlier versions.

UPGRADES AVAILABLE: We have a very reasonable upgrade path for past owners! Just \$179 to add these features to your existing NEB70HD or NEB70HDS monitor. Customer pays shipping.
